### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nathan P. Elder on 19 February 2010.

The application has been amended as follows:

The following claims have been amended as follows –

*Claim 13*

On line 1 of claim 13, "claim 4" should be --claim 1--.

*Claim 19*

On line 1 of claim 19, "claim 2" should be --claim 1--.

*Claim 20*

20. The data modification device as set forth in claim 2 1, wherein the ~~processor~~ evaluator is a reprogrammable device.

*Claim 21*

21. The data modification device as set forth in claim 2 1, wherein the ~~processor~~ evaluator is an ASIC.

*Claim 34*

Claim 34 has been cancelled.

*Claim 35*

Claim 35 has been cancelled.

*Claim 52*

On line 3 of Claim 52, "wherein the generic parameters and the local parameter" should be --wherein the evaluation value and the local state--.

***Allowable Subject Matter***

2. Claims 1-33 and 36-52 are allowed.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose, suggest or reasonably teach claims 1, 28, 31, 38, 41, 42, 43, and 44 and in particular said substitution determination parameter having an evaluation type field for specifying an evaluation type and an evaluation value field for specifying an evaluation value to correspond with the evaluation type in combination with other elements recited in the claims.

As to the closest art of record, Del Sesto discloses a data stripper (604 – figure 6, ¶ 0049) for extracting meta data parameters (i.e., interactive conditional code 303 – figure 3) from a data signal (combined television-interactive code signal 601 sent from broadcast facility to local broadcast subsystem 628) wherein the extracted meta data parameters [303] include a substitution determination parameter (OPT field 308 – figure 3, ¶ 0045 & 0058). Del Sesto discloses OPT field 308 or “substitution determination parameter” provides broadcast server 608 within subsystem 628 with the necessary information to first determine if the interactive content may be replaced (i.e., OPT field 308 is set to designate whether an interactive content may be replaced or “evaluation type”) and second to determine what type of interactive content is currently present (i.e., OPT field 308 may include a flag that provides information to be interpreted locally for deciding what content to select to facilitate replacing the existing interactive content) (¶ 0058). However, Del Sesto fails to disclose OPT field 308 having an evaluation type field for specifying an evaluation type.

Therefore, the prior art of record fails to disclose said substitution determination parameter having an evaluation type field for specifying an evaluation type and an evaluation value field for specifying an evaluation value to correspond with the evaluation type in combination with other elements recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
